

Re-elect Brenner, Mandel and Kirsch

Highland Park/ I have

been an active participant in community affairs for over 15 years, and during that period I have watched many City Councils. I also am privileged to know all of this year's candidates for election to the Council. It's because of that familiarity that I believe that re-electing Mike Brenner, Steve Mandel and Jim Kirsch would best serve our community.

The current council has been the most effective and cooperative that I have seen in recent memory.

Mike Brenner has provided his expertise to the Council for four terms. As a contractor, he often lends his experience in evaluating major capital projects, ensuring that Highland Park residents receive the highest quality value for the dollars expended.

Steve Mandel represents a significant portion of our community: those who are concerned about the preservation of our neighborhoods and the cost of government. When the Lake County Health Department wanted to construct a clinic in a residential area, Steve stepped up and arranged negotiations with the County that led to the center being located downtown, where it belonged.

In the four years that he has served on the Council,

Jim Kirsch has distinguished himself as someone who clearly understands the issues that concern our community. He works hard to reach out and discuss these issues with his fellow citizens.

The city is being run effectively. Re-electing these three fine candidates will ensure that Highland Park remains the model of the North Shore.
